

# How to Create an iPhoto Slide Show

1. Choose the album or groups of photos you want in your show. Click the Add (+) button (lower right side) and then click the Slideshow. Click Add New Slideshow.

2. Type Name of Slideshow - At the top of the window rearrange the images in the order you want by dragging each image to the correct location

← Arrange by dragging images

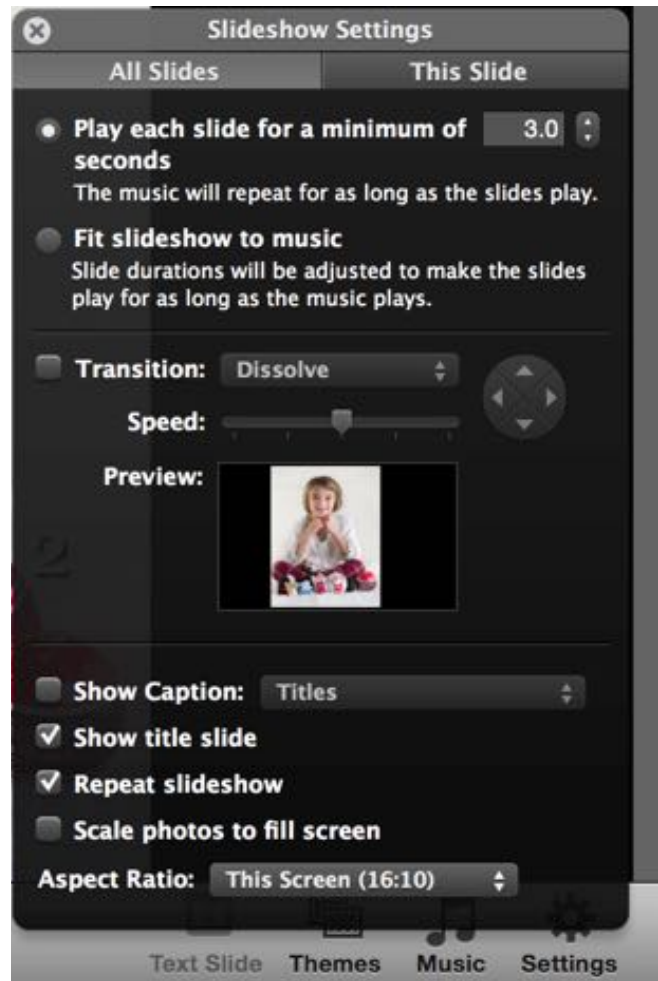

3. Add Music by clicking the Music Button

4. Click the Settings button to change (for all slides or each side):

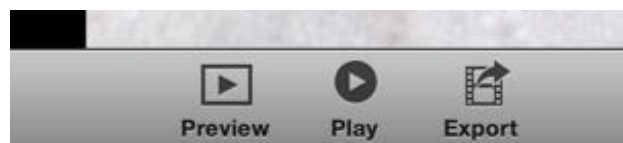

Number of seconds each slide will be displayed

If you have added Music you can fit length of  
slideshow to the music

Slide Transitions

5. Use the

Preview Play and Export

Menu to review your slideshow (make changes if need be) then export your slideshow in the desired format,
